

HPE Networking Instant On Access Point Series Wi-Fi 6

More speed, efficiency, and capacity for the latest business applications

Manage your network on the go

These easy-to-set-up and manage access points deliver strong coverage wherever and whatever you connect. With an affordable price and built-in security, it's Wi-Fi designed with small businesses in mind.

Improve your network's capacity and capabilities with the latest Wi-Fi Certified 6™ HPE Networking Instant On Access Points. Purpose-built for small businesses, these access points have built-in security, an easy-to-use management portal, and enterprise-class features.

All the features you need to accelerate and expand your network

The explosion of wireless devices has burdened the traditional small business wireless network. The latest Wi-Fi 6 wireless networking hardware will improve traffic handling for your employees and customers, save on energy overhead, and will keep up with the growing demands of cloud-based applications. From home office start-ups to boutique hotels, always-on medical facilities, retail shops and cloud-based tech firms, Instant On access points keep you connected.

Benefits

• Energy-efficient

Always active Target Wake Time (TWT) and Transmit Beamforming (TXBF) improve device connection to the access point, reducing the amount of active time a device needs to be on the network.

• Increased capacity

Up to 4x4 antenna array and Multi-Use, Multiple Input Multiple Output (MU-MIMO) increase the number of simultaneous devices that can be connected to an access point, reducing latency and preventing devices from losing connectivity.

• Enterprise-grade security

Simply use secure WPA3/WPA2 or secure open Wi-Fi network access with OWE authentication on your Wi-Fi networks, and we do the rest. A TPM module is installed to securely store credentials, keys and boot codes.

• Peace of mind

A 2-year warranty is included with each access point, along with chat support during the warranty period. Software updates included through the Instant On mobile app or web portal for the product's life.
