

# Bring your A-game to online gaming.

## Want to elevate your gaming experience?

Whether you're competing in a multi-player event or are a casual PC-gaming enthusiast, the last thing you need is spotty Wi-Fi.

The difference between winning and losing could come down to slow and unreliable network connections and ill-timed glitches.

That's why the esports industry is prime for the Aruba Instant On network stack of AP25 and 1960 switches that deliver a power-packed punch for avid professional and recreational gamers.

Aruba Instant On AP25 is Wi-Fi 6 certified and delivers faster Wi-Fi speed, greater capacity and reduced latency for a superior Wi-Fi experience. The Wi-Fi 6 certification guarantees interoperability with other certified devices.

With a maximum aggregate data rate of **5.3 Gbps**, AP25 access points provide the speed and reliability gamers can count on. Its **160 MHz** channel bandwidth delivers high wireless throughput for gaming consoles and eliminates lagging and buffering when streaming HD video. **Four spatial streams (4SS)** allow for broader Wi-Fi coverage as compared to previous wireless generations.

To get an even faster and more stable experience, connect your gaming equipment to Aruba Instant On 1960 switches. The 1960 stackable switches provide seamless connectivity to access points and gaming consoles to deliver fast, lag-free high-def video streaming for uninterrupted gaming.

Time your next move to the speed of innovation and stay ahead of your competition with the Instant On AP25 and 1960 Switch Series.
